Attachments: HP Parcel E Fnl Execution Plan-Text.pdf

Lily,

The incident that started the anomalous soil sample issue (2012) was soil samples collected from building 517 which is in Parcel E. The Parcel E 500 SERIES AREA Execution Plan (2011; attached) refers to this document and two other work plans for the parcel rad remediation: Base-wide Radiological Work Plan, Revision 1, (October 5, 2007: TtEC), and the Basewide Radiological Support Sampling and Analysis Plan for sample analysis: Final Execution Plan, Basewide Radiological Support, Attachment 1, (Jan. 2011, TtEC). I'm sure these applied to Parcel C as well. I couldn't find a specific abstract; only the one for the sewers and storm drains.

http://www.envirostor.dtsc.ca.gov/public/final_documents2.asp?global_id=38440002&doc_id=60267150

Couldn't find the 2nd one. I'll have to search the file room.

Nina

Here are the closest things I could find. If you have earlier ones, and they're similar to these, that would be good to know.

- 1 - the latest (2015) workplan w/details, and a description of .
- 2- description of storm drain & sewer removal progress that occurred in 2013

Unfortunately #1 & #2 don't apply to the time period when previous anomalous samples were found.
